

# Night Chats at Lake Claremont

Join us to save Perth's  
precious biodiversity

Learn about a new initiative to create a network of people to sustain biodiversity in our global biodiversity hotspot and engage nature sensitive urban design across Perth.

## **NatureLink Perth seeks to answer the question:**

“What needs to be done to get a sustainable network of natural assets across Perth?”

*Dr Jane Chambers and her team are meeting with as many stakeholders as they can to understand the different perspectives, barriers and opportunities to sustaining our biodiversity into the future. NatureLink Perth will integrate knowledge and perspectives from all of these people and present this information at a symposium on 4<sup>th</sup> July 2019.*

*In this talk she will be presenting a number of things anyone can do to help sustain our plants, animals, wetland and bushland ecosystems and improve your own quality of life at the same time. Come along and see how.*

*Dr Jane Chambers is a Senior Lecturer in Environmental Science, Management and Sustainability at Murdoch University. She has over 30 years experience in wetlands, rivers and estuaries in South Western Australia primarily in the area of aquatic plant ecology, management and restoration. She has coordinated integrated research into climate change and contributed to many wetland management agencies, including her role as Deputy Chair of the Swan River Trust.*

**Tuesday 23<sup>rd</sup> April 2019 | Time: 6:00pm to 7:30pm**

**Meet at the Clubrooms, Claremont Aquatic Centre,  
12 Davies Rd, Claremont.**

Refreshments served from 5:30pm for a 6:00pm start.  
Talk and formal questions conclude at 7:00pm but all are welcome  
to stay until 7:30pm.
